

Dear <first name>:

I am thrilled to be writing to you today with important news on how to increase your wealth while solving a major problem in the world.

As a Fire Captain in Fullerton, California for 25 years, I have accomplished many good things.

And yet, I consider it one of my greatest accomplishments to have worked with Thom Garlock.

I think Thom is a genius.

He's made me \$200,000 in profits, for one thing. But I am even more proud to tell you that, after years of success and sound advice, I consider him a good friend.

I urge you to read Thom's enclosed invitation. He told me you were handpicked to receive it.

Thom is offering something Americans need badly, while at the same time fixing an inefficient global response system.

I am only one of Thom's 300 investors (most of them millionaires), so I can't speak for all, but I can tell you about Thom's special talent, his integrity, and why I consider his investment ideas far safer than stocks and bonds.

What you learn from Thom could both protect and increase your wealth.

Feel free to call me any time to ask about my experience working with Thom. I'm glad to help out any way I can.

Sincerely,

A handwritten signature in black ink that reads "Tom Metcalfe". The signature is written in a cursive, slightly slanted style.

Tom Metcalfe

(Retired Fire Captain, Fullerton, CA)

P.S. I offered to put my phone number in this letter, but

Thom said too many people might call. So I'm told that if you want to talk with me, you can mark the checkbox in the response form and Thom will forward my phone number to you.
